LIST OF AUTHORS

	Page		Page
<i>Alfredsson, S.</i>		<i>Lundberg, G.</i>	
The new steam power-station at Slite	63	Some heavy-duty electric overhead travelling cranes	1
<i>Andersson, A. R.</i>		<i>Nerman, H.</i>	
Micapact insulation	87	AB Mörrums Bruk and Nymölla AB — two Swedish pulp mills	2
<i>Berglund, C.</i>		<i>Ottosson, G.</i>	
The new steam power-station at Slite	63	Paper-machine drives with thyristor converters	15
<i>Birkeland, B.</i>		<i>Rydinger, M.</i>	
The new steam power-station at Slite	63	Lining practice for large induction furnaces	11
<i>Fahlman, P.-O.</i>		<i>Sallow, A.</i>	
Automatic moisture control of foundry sand	107	Automatic mooring winches	
<i>Fryxell, J.</i>		<i>Strömberg, T.</i>	
ASEA's new high-voltage hall at Ludvika	43	ASEA generator deliveries for Snowy Mountains	13
<i>Granö, N.</i>		<i>Svensson, E.</i>	
Paper-machine drives with thyristor converters	158	Billet mill at Smedjebackens Valsverks AB, Sweden	15
<i>Hammar, L.</i>		<i>Söderlund, K.-G.</i>	
Magnetic disc brakes for 0.2-90 kgm	140	Some interesting applications of ASEA's mains-frequency induction furnaces of channel type	7
<i>Hammarlund, B.</i>		<i>Tengstrand, C.</i>	
The grid control of static converters	3	Micapact in large synchronous machines	9
<i>Helén, C.</i>		<i>Thernsjö, A.</i>	
Micapact insulation	87	The new steam power-station at Slite	6
<i>Hyltén-Cavallius, N.</i>		<i>Tiljander, K.</i>	
ASEA's new high-voltage hall at Ludvika	43	Some interesting applications of ASEA's mains-frequency induction furnaces of channel type	7
<i>Håkansson, G.</i>		<i>Törnros, H.</i>	
The grid control of static converters	3	Paper-machine drives with thyristor converters	15
Billet mill at Smedjebackens Valsverks AB, Sweden	151	<i>Török, V.</i>	
<i>Landau, F.</i>		Antenna drive system for radio telescope on Råö	15
Cement-kiln drives with d.c. motors fed by transductor-controlled silicon rectifiers	23	<i>Virsberg, L.-G.</i>	
<i>Laurell, L.-G.</i>		New cable termination for plastic-insulated cables	11
New cable termination for plastic-insulated cables	118	<i>Walöen, A.</i>	
<i>Lindgren, A.</i>		Hydraulic disc brakes	5
Flywheel converter for delayed under-voltage tripping	36		

LIST OF CONTENTS

	Page		Page
<i>Research and testing</i>		Servo voltmeter*	102
ASEA's new high-voltage hall at Ludvika	43	Relay testing set*	103
Rapid impulse voltage divider for 2 MV*	78	New over-current relays types RIDI and RIDSI*	124
Electrical connection and terminal systems for laboratories and test rooms*	82	Orders for high-voltage switchgear*	128
Relay testing set*	103	Level switch*	146
Direct digital computing of acoustical data*	124	Time-lag over-current relay type RIDA with independent time-lag characteristic*	167
Fuel-cell battery for demonstration purposes*	145	Auto-reclosing equipment serving several lines*	168
Antenna drive system for radiotelescope on Råö	155	Thermal over-current relay type RVAA and over-current release type RVAUA*	169
<i>Cables</i>			
New cable termination for plastic-insulated cables	118	<i>Traction and marine equipment</i>	
<i>Nuclear power</i>		Automatic mooring winches	9
Contract for Marviken reactor*	78	Large marine generators*	40
<i>Turbines</i>		<i>Cranes</i>	
The new steam power-station at Slite	63	Some heavy-duty electric overhead travelling cranes	13
First fully automated steam plant in Sweden*	83	Electric overhead travelling cranes with hoist crab*	17
STAL turbine largest in the world for district heating*	167	Slag-handling crane for Oxelösund Steelworks*	80
<i>Electric machines</i>		Mukand Iron & Steel Works Ltd., Bombay, India*	121
Silent motor for 220 kW, 3000 r/m*	19	<i>Electric furnaces and induction heating</i>	
The M motor in use*	20	Some interesting applications of ASEA's mains-frequency induction furnaces of channel type	72
Flywheel converter for delayed under-voltage tripping	36	Induction hardening of the impact surface of hammers*	102
Large marine generators*	40	Lining practice for large induction furnaces	111
Micapact insulation	87	Mukand Iron & Steel Works Ltd., Bombay, India*	121
Micapact in large synchronous machines	94	Large orders to ASEA from the Spanish iron and steel industry*	166
Synchronous condensers for Australia — a world record*	100	Electric furnace seminar in England*	170
Tractor-driven generator set*	103	Furnace order from Chrysler Corporation, U.S.A.*	171
Commutator motor type A*	122	<i>Electric power plants and networks</i>	
ASEA receive large order for the Niger Dam Project*	126	Flywheel converter for delayed under-voltage tripping	36
Portable generating sets*	127	The new steam power-station at Slite	63
ASEA generator deliveries for Snowy Mountains	131	First fully automated steam plant in Sweden*	83
Magnetic disc brakes for 0.2—90 kgm	140	Tractor-driven generator set*	103
New advanced three-phase motor of light alloy*	147	Portable generating sets*	127
<i>Transformers</i>		HVDC transmission in Canada*	165
Largest export transformer*	59	<i>Industrial equipment</i>	
ASEA receive large order for the Niger Dam Project*	126	Cement-kiln drives with d.c. motors fed by transductor-controlled silicon rectifiers	23
Giant transformer*	127	AB Mörrums Bruk and Nymölla AB — two Swedish pulp mills	27
ASEA 735 kV transformers cross the Atlantic*	172	Hydraulic disc brakes	51
<i>Static converters</i>		Large order to ASEA from Finland*	60
The grid control of static converters	3	Thyristor converters for the Finnish pulp industry*	81
Cement-kiln drives with d.c. motors fed by transductor-controlled silicon rectifiers	23	Cold rolling mill in France*	104
Large order to ASEA from Finland*	60	Automatic moisture control of foundry sand	107
Thyristor converters for the Finnish pulp industry*	81	Mukand Iron & Steel Works Ltd., Bombay, India*	121
Large order from international steelworks*	126	ASEA deliveries to Mauritius*	122
Billet mill at Smedjebackens Valsverks AB, Sweden	151	Large order from international steelworks*	126
Paper-machine drives with thyristor converters	158	Magnetic disc brakes for 0.2—90 kgm	140
HVDC transmission in Canada*	165	Differential mechanical drive equipment for paper machine*	148
Large orders to ASEA from the Spanish iron and steel industry*	166	Billet mill at Smedjebackens Valsverks AB, Sweden	151
<i>Electrical apparatus and switchgear</i>		Paper-machine drives with thyristor converters	158
Air-blast circuit-breakers of new type*	39	Electrical equipment for continuous cold rolling mill*	164
Electrical connection and terminal systems for laboratories and test rooms*	82	Large orders to ASEA from the Spanish iron and steel industry*	166
Contactors type EG 10*	84		

	Page	
<i>Organisation and staff, exhibitions, etc.</i>		New ASEA factory and offices in Brisbane*
ASEA at the New York World's Fair*	18	Uno Lamm awarded the Lamme Medal of the Institute of Electrical and Electronics Engineers*
Johan Drakenberg	38	New ASEA brochures
New ASEA brochures	50	Canadian Pulp & Paper Association's Convention 1965*
New appointments*	57	Three exhibitions*
Visit to the ASEA São Paulo Transformer Factory by the Brazilian Ambassador to Sweden*	59	
Åge Walöen appointed Professor in Trondheim*	100	* News in brief
